This suit must get over with as it is wasting the taxpayers and shareholders money. Microsoft is a very reputable company and the Department of Justice needs to finalize a decision as it makes our JUSTICE SYSTEM what it appears to be - a money wasting, ineffective system that does not work for the best interest of - WE, THE PEOPLE who pay and use this system. It just opens doors for lawsuits on any and all companies and has absolutely destroyed our faith in the stock market.

When you are through then you can punish Judge Penfield Jackson for discussing a case to the media and public before it was finalized. At that point, this suit should have been dropped in its entirety.
